Residents and councillors roped in to help achieve Low Carbon City Status

THE Shah Alam City Council is committed to ensuring the city achieves its aim to be a Low Carbon City by 2030.

Efforts to reach this goal is not being carried out in isolation as the council has roped in councillors and residents through community programmes to promote green initiatives.

One such programme is the Mini ZeeBee Zon Bersih, which was introduced in 2013.

Through this programme, the community is brought together by the Residents' Representation Council to preserve the environment and promote green practices.

To further generate creative ideas on green initiatives, the

council organised a Shah Alam Green Neighbourhood Awards 2016/2017 briefing at Dewan Bankuet, Setia Alam, on Nov 12.

The programme, which drew 150 participants made up of councillors and residents' associations members, focused on green practices such as conservation and recycling.

Participants were also exposed to techniques to turn leftovers into compost.

Among the invited guests who shared their expertise were Village, Town and Country Planning department officer Mohd Zainuddin Jumaat and Kampung Sukunan Yogyakarta recycling project head Iswanto Nato.
